Experienced developer (m/f)

Context

In order to enhance our existing development team, active in supporting research projects and the development of products and applications for the security sector, itrust consulting would like to hire an experienced developer.

Requirements

- Reliable knowledge of python and C/C++;
- Sound understanding of the J2EE environment (Java, Eclipse, Maven, Spring framework, Hibernate, JPA, SQL);
- Excellent comprehension of Web technologies (HTML, CSS, JavaScript);
- Familiar with testing concepts (Unit testing, test automation with selenium-based tools);
- Proven documentation skills e.g. defining requirements and specifications;
- Applied knowledge in source code versioning (git);
- Analysing and modelling skills (UML);
- Experienced in development and acquainted with development management methods such as SCRUM, and tools like JIRA, SAFe, Redmine;
- Know-how of container technologies (Docker, docker-compose, docker-machine) is considered as an advantage.

Profile of the candidate

- Master's degree in computer science or equivalent;
- Experience in product specification would be an advantage;
- High motivation to propose new services;
- Relevant certification linked to development, security or technology would be an advantage;
- Fluency in English (Luxembourgish, French and German are considered as an advantage);
- Capability to work independently and within a team;
- Analytical and synthesis skills for writing technically correct, convincing and easy-to-understand reports;
- Good knowledge of tools like Microsoft Word and Excel, or Latex.

Thank you for sending your most recently obtained diploma, your updated CV and a letter of motivation to Ms Marieta Dimitrova.
